Henderson General Hospital
above: New main entrance

below: New Emergency Department

McMaster University Medical Centre

Where we're headed:

- Strengthen Centre of Excellence in Pediatrics at McMaster Children's Hospital
 - increased services including dedicated pediatric Emergency Department, Pediatric Critical Care Unit, inpatient mental health unit
- Obstetrics including high-risk obstetrics, gynecology and other women's health services
- New McMaster Children's Hospital Research Institute
- Adult ambulatory services and same-day surgery
- Expanded endoscopy suite to enhance the Digestive Diseases program

How we'll get there:

- Build a new urgent care facility to meet the needs of south-west Hamilton mountain
- Cardiology activity relocates to the Hamilton General
- Malignant hematology, gastroenterology and surgery including surgical oncology moves to Henderson
- Inpatient general medicine transfers to other Hamilton hospital sites
- MUMC receives some ambulatory services and same day surgery from Hamilton General and Henderson General

New Pediatric Critical Care Unit

Chedoke

Where we're headed:

- Strengthen McMaster Children's Hospital programs including Developmental Pediatrics and Child and Youth Mental Health
- Chedoke will continue as the site of the Total Joint Assessment Centre and the hub site of the Ontario Breast Screening Program
- HHS support services and administration

How we'll get there:

- Build a new Ambulatory Centre for McMaster Children's Hospital services
- Relocate all rehabilitation services to the Hamilton General

New Ambulatory Centre for Developmental Pediatrics and Child & Youth Mental Health
McMaster Children's Hospital, Chedoke Site

Access to the Best Care is a plan that will involve working with many staff, physicians and health care partners to realize the vision.

Clinical areas not represented in this document will be included as plans are developed and refined.
